DonationBox

Welcome to www.donationbox.co.uk. We have been designing and manufacturing collection boxes for over 5 years and with that experience we know what designs will work best for your venue. This will hopefully maximise your income.

Based in the North East of England, we aim to provide you with a fundraising box which will assist you in increasing your income.

We try our best to make you happy and not just through the purchasing process. We include a 12 month service contract with every donation box so you have total confidence with your purchase.

We strongly feel our donation boxes are the best available and the testimonials we have received from our customers back up this claim. 2010 also saw us become the main supplier of museum grade fundraising boxes in the UK.

We will work with you and produce a quality donation box, which suits your needs and fits perfectly with your existing decor or architecture. Alternatively it can be contrasting, bright and vibrant to attract attention and donations.

Interactive donation boxes are a large part of our work with gravity fed coin donation boxes, coin chutes, hyperbolic funnels and coin activated electronic boxes being particularly popular. Enhancing a box in this manner brings your box to life and attracts further donations.

We can also fit an LED light box to your donation box. This is a fantastic way to draw attention to your collection box.

Our steel boxes are naturally heavy and additional weight can be added to reduce the risk of theft. We can also add brackets, lockable steel ropes and floor fixings if required.

Whether your box is made from solid FSC certified wood or steel we can personalise it to you and your needs.

Colour, graphics, gift aid facility, pen holders and anti-theft deterrents all enhance your box. We manufacture donation boxes that not only compliment an environment, but improve your income.

We also offer a bespoke design service. We will individually design a donation/collection/contribution box to suit your specific needs and specification.

The design cost can be free if we feel the design has a legacy for us.

The boxes we make are finished to a very high standard which meets current Fire regulations.
